Remote Access Panel

The NPFA20 requirement ensures an alarm panel must be installed in locations for supervision at all times to assist in communication if the pump room cannot be constantly attended.

Utilizing a modern Quad core 64bit ARMv7 processor based microprocessor we are able to feature 20 programmable inputs for full 5 zone coverage with an option of utilizing 5 programmable outputs. Real time monitoring and deployment of available controller outputs for monitoring, alarms, event Logging and remote messaging to any smart phone or computer as events occur.

- 802.11 b/g/n Wi-Fi
- 10/100 Base T Ethernet
- 3.5mm Audio Out Jack
- USB Data Log Retrieval
- Real Time Logging of up to 20 Inputs or Alarms
- Pump Room Camera capable
- Customizable Buttons
- Up to 5 Remote Outputs
- 3 level security password protection
- Selectable Alarm Sounds
