As we all know ROMS are widely available in internet and it is easy to find them free.

You are paying for a fully functional setup Arcade cabinet this includes the time we spent on creating, configuring, packing and building your RetroPie Setup. The Joystic, and all buttons are preconfigured to your software. You are not paying for ROMS

ROMS should be considered as backup or for testing purposes only.

By buying this from us you are contractually agreeing to the rules mentioned below:

If you decide to keep roms make sure you own a licence for any ROMS you will use

You will NOT distribute any of these files illegally.

The ZX Spectrum is an 8-bit personal home computer released in the United Kingdom in 1982 by Sinclair Research. The Spectrum was among the first mainstream-audience home computers in the UK, similar in significance to the Commodore 64 in the USA. Over 24,000 software titles have been released since the Spectrum's launch and new titles continue to be released—over 100 in 2012.

Street Fighter is a fighting video game franchise developed and published by Capcom. The second game in the series is credited with establishing many of the conventions of the one-on-one fighting genre. The game's playable characters originate from different countries around the world, each with a unique fighting style. It is Capcom's third best-selling franchise behind Resident Evil and Monster Hunter, having sold 33 million copies worldwide.
